DETAILED ACTION

Election/Restrictions

1. Claims 9-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 02 October 2003.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kingman, '900 in view of Hays, '254, as set forth in the Office action mailed 04 August 2005.

Response to Arguments

4. Applicant's arguments filed 11 January 2005 have been fully considered but they are not persuasive. Applicant has overcome the provisional double patenting rejection. Applicant has not provided evidence showing that his device is non-obvious over Kingman as modified by Hays due to unexpected results. Applicant also argues that the edges of Hays are rounded to avoid cutting the abrasive strip wrapped around the block. The examiner agrees that the edges disclosed by Hays are not knife-edges, or edges shaped to such a degree that they are cutting edges. Applicant's own device is defined in his specification as "According to this invention, a given one of the opposite edges of each expansive side 12 is a curved edge 20 and the other one of the opposite edges is a sharp edge 22 *defining an acute angle (A) in the range from about 55° to*

about 70°... It is the examiner's understanding that it is the size of the angle that determines the sharpness of the edge. The passage of Hays that applicant relies upon, as set forth in the Brief, page 5, does not refer to the edges of the sanding block, but the edges of the slot formed in the block as shown in figure 4. Hays, figures 1 and 3, clearly shows, as viewed macroscopically, both an edge formed by an obtuse angle, and a sharp edge formed by an acute angle in the range of from about 55° to about 70°.

Conclusion

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
